

TRAINING PROGRAM FOR ARTICLED STUDENTS

Chartered Accountancy is one of the fastest growing professions in India. India is also home to the largest number of CAs in the world. Training to be a CA is a fairly demanding task. You need to work approximately 7-8 hours each day in an office, and then study for your exams. On qualifying, you are rewarded with social recognition, status, money and an opportunity to serve the society.

The firm aims to train CAs who wish to practice after qualifying or will join a National or an International Aid agency. They might also work with large NGOs whose work spans the nation. The training program has intense focus on conceptual learning and practical exposure.

EXPOSURE
